

# FLIGHT HEAD CL

The three axis gyrostabilized FLIGHT HEAD CL is extremely versatile remote camera head that features unique design. CL enables precise, stable and smooth camera moves and works on all types of camera cranes, towercams, camera dollies, tracking systems, camera cars, cablecams, etc. The lightweight, durable, compact and small profile of Flight Head CL makes it an ideal camera head for a variety of complicated and highly dynamic shots allowing you to get to tricky angles and perfectly capture sharp footages in challenging conditions. Accommodates all popular broadcast and motion picture camera packages.

- Quick release camera plate
- Angular position indication
- Wired / Wireless
- Mount type: Mitchell
- Recorded moves
- Shake generator
- Drift compensation
- Custom horizon
- Hold position
- PID presets
- Limits

## SPECS:

Effective stabilization  
throughout 200mm focal length  
Speed: 120°/sec  
Pan limit: 360°  
Tilt limit: +50°, -230°  
Roll limit: ±40°  
auto horizon or steerable

Operating temperature range:  
from -20°C up to +40°C  
Head weight: 19kg  
Payload: up to 30kg

## POWER REQUIREMENTS:

27-32V DC  
Standby: 2A  
Dynamic Max: 15A
