

# CASCAD 10

The CASCAD 10 is one of the most flexible and versatile camera cranes in its class. Engineered for use with a remotely operated stabilized camera head to enable camera to traverse up and down as well as from side to side while flying high in the air. It gives smooth, floating shots, raising a production value and giving new angles and perspectives that would otherwise be hard to get any other way. Cascade 10 can be easily transported, delivered, assembled and operated in hard to reach places.

- The original Academy award winning technology (AMPAS)
- Modular design
- Stable and safe operation
- Breaks down in portable elements
- Pneumatic or track wheels
- Allows technically challenging and creative shots
- Nearly effortless and user friendly operation
- Head control: Joystick

#### SPECS:

Boom configurations:  
2m, 4m, 6m, 8m, 10m  
Pan: 360°  
Tilt: ±45°  
Dolly base: 1,6x1,6m  
Weight: 650kg  
Payload: up to 80kg
