

CASCADE MINI

The Cascade Mini is a lightweight and compact camera jib for use with a remotely operated camera head. It can be configured for a single operator or "cine style" 2-man operation. Cascade Mini has a proven history of use and is just perfect for any music video, sport event, concert or feature film. This highly effective camera jib can fit almost any location and is able to add production value to any shoot.

Cascade Mini features:

- Modular design
- Quick and easy setup
- Low profile boom
- Head control: Hand unit controller or joystick console
