

CROSS COUNTRY

The CrossCountry is a camera crane that offers superior productivity. This high performance crane can be mounted on a wide range of mobile platforms: camera trucks, boats, trains, etc. and is used to do chase scenes with cars, bicycles, horses or anything traveling. CrossCountry enables high angle crane shots and fast tracking shots with much greater freedom of camera movement.

- Used in combination with a stabilized camera head and rotary damper for smooth and stable shots
- Highly versatile camera crane
- Easy set up and operation
- Portable sections
