

FLIGHT HEAD Q2

Introducing our newest stabilized Flight Head Q2 designed to provide stability and versatility in capturing high-quality footage. This camera head combines advanced stabilization technology with a compact design and allows for seamless installation in confined spaces, expanding the possibilities of capturing dynamic shots from previously challenging angles. It incorporates industry-standard mounting options, making it compatible with camera cranes and other camera support systems.

SPECIFICATIONS

Pan limit: 360°
 Tilt limit: +55°, -235° with PAN extension
 +40°, -35° without PAN extension
 Roll limit: 360° continuous autohorizon or steerable
 Speed 120°/ sec
 Temperature range: from -20°C up to +40°C

Head weight: 10kg - 3 Axis Mode
 7kg - 2 Axis Mode
 Max. payload: 9kg
 Max. payload for use on a tracking vehicle: 8kg

POWER REQUIREMENTS:
 28-32V DC
 Stand by: 2A
 Dynamic max: 30A
