

SPIDER DOLLY

The SPIDER DOLLY is a motorized remotely operated camera dolly designed for sweeping on-air shots. It is perfect for use in concert halls and sport arenas where smaller rail footprint is required. Spider dolly runs on tracks and allows straight line and / or curved camera movement. This high performance camera dolly delivers spectacular beauty shots, smoothness, refreshing perspectives, complicated and perfectly controlled dynamic shots.

- Can be equipped with a lift arm or fixed height risers
- Safety: Surveillance cameras, emergency stop
- Used in combination with a stabilized head
- Capable of carrying two remote heads
- Modular design
- Control: Joystick
