

TRAVELING CASCADE

The Academy Award winning design of Traveling Cascade is one of the most innovative outstanding technologies on the market. This unique camera crane enables ultra long camera reach and impressive long take shots.

Traveling Cascade lifts up a camera to great heights and perspectives for unparalleled and immersive tracking shots. The crane allows a remotely operated camera movement all the way along the boom in both directions capturing wide range of complex and highly dynamic shots. It offers flexibility and new creative opportunities for filmmakers by enhancing the parallax effect, richness of the frame and visual perception of movement. Traveling Cascade brings an excitement, value, dynamic, magnitude, beauty and tension to any film or video production.

- Modular, user-friendly and robust design
- Allows operators to position camera precisely, effortlessly and efficiently
- Used in combination with a stabilized head and rotary damper for smooth and stable shots
- Arc compensation
- Bogie control: Joystick

SPECS:

Payload: up to 55kg

Pan: 360°

Tilt: +35°, -30°

Weight: 4000kg

Temperature range:
from -20°C to +40°C

POWER REQUIREMENTS:

220V AC

Standby: 0,4A

Dynamic Max: 10A
