

FLIGHT HEAD XL & XXL

The FLIGHT HEAD XL and XXL are 3 axis gyrostabilized camera remote heads engineered for work with heavy and large camera packages. They can accommodate all popular 3D rigs IMAX, PACE, PARADISE FX, ET, STEREOTEC, ARRI and PANAVISION camera packages with heavy zoom lenses. These robust and durable remote heads eliminate the problem of jerks, vibration, jumps, bumps, ensuring an extremely smooth picture, responsive control and precise camera positioning. XL and XXL can be mounted on a wide range of moving platforms: telescopic and regular camera cranes, camera cars, quads, cablecam rigs, camera dollies, etc.
