

RAILCAM

The Railcam series of camera tracking systems designed and engineered for dynamic overhead shots. They are used for straight-line, curved or combined movements of camera at fixed heights and have the versatility to carry any type of stabilized remote head allowing for highly dynamic moves, stunning, stable and precisely controlled camera shots. Railcam systems deliver unique perspectives and add production value to any live, multi-camera and studio work.

- Available in various configurations
- Custom curves can be made to specifically fit your needs
- Mounted to a lighting truss
- Modular design
- Control: Joystick console

SPECS:

Width of tracks: 20cm
Max. length of tracks: 60m
(more tracks on request)
Speed: up to 4 m/sec

POWER REQUIREMENTS:

220V AC
